Dark Web, Data Breach & Web Search

White paper // Fact sheet

Dark Web | Data Breach | Web Search Module

DARK WEB SERVICES

- Searches for leaked credit cards/debit cards info, passwords, email ids, vulnerabilities.
- Dark web monitoring also monitors GitHub, Cloud-Nas, Paste-bin links and other dark web repositories for TLP red or amber information pertaining to Client.
- Third party risk assessment from dark web.
- Continuous monitoring of all URL/IP (external).
- Continuous monitoring of the dark web by CSPF's Red Team to hunt for data breach exposes.
- Search of multiple dark website/forums for compromised sensitive data information - searches over 5000 dark website market places.
- Results are intimated weekly via email, also accessible from Reeja Vajra AVA panel.

DATA BREACH SERVICES

- Module searches over 5000 dark web market places, for leaked credit cards/debit cards info, passwords, email ids, vulnerabilities.
- Client imports email ids on excel sheet into module's data breach panel. Data breach modules searches around a billion records of data breach database. Finds email ids of client that may have been compromised. As a preventive mechanism, employee/s are advised by module to change their official, personal and social media passwords.
- **Use case:** Credit card/debit card dump, vulnerabilities & 0days, email ids and passwords found on dark web of almost every BFSI and many other organizations.
- Results are intimated weekly via email, also accessible from Reeja Vajra AVA panel.

WEB SERVICES

- Extensive web search to hunt for negative/malicious comments.
- Specialised Israeli search technology to hunt the web, searches internet/blogs/social media. Use of AI and machine readable format data, highly scalable to include large number of keywords for filtration by analyst.
- Early detection can provide organisation time to respond legally or allow HR/top management to defuse the issue.
- **Use case:** Payment for insurance policy through payment gateway, but data not captured by insurance company. Customer Care asks customer to check with payment gateway, upset customer instead puts out story on Facebook/Mouthshut.com, threatening to go to consumer court.
- Web-search discovers this and to defuse situation, senior management takes up matter with payment gateway, helps issue policy to customer with apology.
- Results can be given weekly for further action by Client.

Protecting your digital assets...

ABOUT Tatva Networks

Tatva Networks, your number one source for information technology problems. We're dedicated to giving you the very best of products, with a focus on innovation, technological empathy and viability. Tatva Networks can offer you the world's most advanced cybersecurity solutions and products at your buying window budget. We now serve customers all over India, USA and China and are thrilled that we're able to turn our passion into your company's cybersecurity runway.
